Message from Nikhil Thakral

Hello Everyone!!

I'm Nikhil Thakral, currently working as Field Service Manager at HLS Asia Ltd. I've been associated with the company for last 9 years or we can say "my complete professional life till date". Thank you for this opportunity to share a brief about my life.

Being related to the state of Haryana, I spent first few years of my life in a village called 'Laloda' in Fatehabad district of Haryana. Well, I don't remember much from that part of my life, but my parents always talk about the beautiful memories from there. At the age of 3, we got shifted to a nearby township, Tohana, where I started my schooling.

I completed my schooling from DAV Public School, Tohana and chose for a non-medical career. I moved to Kota, Rajasthan, to prepare for engineering entrance exams. Following this, I cracked a reasonable All India Rank & joined Mechanical Engineering in Delhi Technological University (formerly Delhi College of Engineering), Delhi in 2010.

I had a remarkable time in my college days. I did get to a whole new series experiences in terms of learning as well as fun activities. I was at a new place, with my college experience I can say, “Vo din bhi kya din the”. But apart from all those fun-activities, I started to think about different industries to join after my college.

During later phase of college-placement drive, the organization, HLSA, came for campus visit and I got a chance to attend the Pre-placement Talk (PPT). I was fascinated by the unique job profile offered and decided to continue with the process. I cleared Campus rounds and was called for field visit to Gandhinagar Base and was finally selected for JFE after final round of interview in Noida. I joined HLSA on 12-Aug-2014 and entered the new phase of my life.

My professional journey went through different phases as well as challenging times. There were many easy and difficult jobs. Initially, I joined at Barmer location and moved to Mumbai Offshore in 2016. There were a lot of experiences worth remembering. Some of these includes – working in high temperature (around 45-46 deg. C) during day to chilling temperature in nights, daily chopper sorties for 40-50 days for rigless operations in offshore, in house shifting of MAST from one chassis to another and many more.

After working for around 6 years in field and progressing from JFE to MFE, I was shifted to office role as coordinator/ lead engineer in Mumbai Base.

With the consistent efforts and support from all my seniors, I am able to make a remarkable experience with this organisation. Apart from technical stuff, I've learnt professional values, proficiency strength, workplace ethics, etc. all working with this workplace.

One thing I have realised, it is never easy to make persistent efforts. You can work hard only when you love your work and your work becomes a part of your life. I've learned a lot, still learning and will be able to learn a lot more with the same spirit.

I would sum up with a beautiful quote,

“Choose a job you love, and you'll never have to work a day in your life.”

Welcome to theHLSA Family

Big high-fives to our newest HLSA family member! Your vibe fits right in, and we're pumped to have you on board. Let's make some magic happen together!

TAKE A BRAIN BREAK!

1. There's a one-story house in which everything is yellow. Yellow walls, yellow doors, yellow furniture. What color are the stairs?
2. What can you break, even if you never pick it up or touch it?
3. What goes up but never comes down?
4. Riddle: What gets wet while drying?
5. मेरे पास गला है पर सिर नहीं है, मेरी बाजू है पर हाथ नहीं है, बताइए मैं कौन हूँ?
6. काला घोड़ा सफेद सवारी, एक उतरा तो दूसरे की बारी, पहचान कौन?
7. रोशनी मुझे बनाती है, अंधेरा मुझे मारता है, बताइए मैं कौन हूँ?
8. वह कौन है जो आधी रात को ही आती है और आधी रात को ही चली जाती है?

Answer:

1. There aren't any—it's a one-story house.
2. A promise
3. Your age
4. A towel
5. कमीज
6. तवा और रोटी
7. परछाई
8. तारीख
